

Vodafone R&D, Due Diligence Objective:

October, 2006 Vodafone R&D Leader1: Razz - Yes, if you have a proof of concept today we can get you with our Spanish Sofwtare labs to due some technical dues dilligence and set up a trial.

30 Nov 2006 Vodafone R&D Leader1: Razz - the process that we must go through is one of due dilligence.

In Retrospective - "Misunderstandings" (see below) may not have been accidental

December 7, 2006 Razz Van: Hi Paco (*Vodafone R&D Leader2*), You will have the requested material by tomorrow. I apologize for the delay again, as I want as much if not more than you, to start making headway. At the same time, there was a bit of a delay caused by misunderstandings, breakdown in communication (the misunderstanding that OM didn't have a proof of concept taking us in the wrong direction for a while, and long periods before replies from VF were received) contributing to a period of marching in place.

Razz, Reaffirming Proof of Concept Existence and Availability:

January 5, 2007 Razz Van: Paco (*Vodafone R&D Leader2*), demo for most of the material described in documentation sent to you has already been developed, available for evaluation at your request.
