

Vodafone R&D –
Historical Events, Summary Outline, V1.01

2010, October+:

- *1st Contact Initiated with Chairman of WAC (Vodafone Deputy CEO for Europe) – Scope: Innovation Solutions for WAC-members as a Global Standard.*
 - *Vodafone Executive Appointed on "Fact Finding" by WAC Chairman (VF Deputy CEO) – Upon Contacting me, he Denies All History with VF R&D/questions truth-value of my introduction to WAC Chairman/VF Deputy CEO.*
1. Chairman of WAC (also Vodafone CEO for Europe) is contacted within the scope of proposing the breakthrough innovation "Semantic ActiveNet" as a solution for WAC/WAC members. In the introduction, he is also informed of existing History/Relationship with VF R&D.
 2. Chairman of WAC/Vodafone CEO for Europe appoints VF Exec to engage me – apparently on a "Fact Finding Mission", questioning the truth-value of my claim for a history with VF R&D.
 3. VF Exec appointed by Chairman of WAC is hostile in 1st Contact – claiming to represent the views of VF R&D AND of the Newly-introduced VF R&D Leader4 who was scheduled to discuss R1 Production with me – claiming that he had been informed by VF R&D that none of what I had presented to WAC Chairman/VF CEO were true, that there was no past relationship with VF R&D, and that I should stop making up such stories. He continues, requesting that I should send him detailed IP information as Non-Confidential (asking me in effect to invalidate the existing NDA binding Vodafone to respect my IP rights), and he'll decide what next.

NOTE: *Ironically, the VF Executive appointed by WAC Chairman/VF CEO for Europe – to discover facts – this in itself a questionable event, if considering the real life events i.e., "Due Diligence" involving Vodafone since 2006 – but ironically, the VF Executive disqualifies himself from his first message to me, as it will be presented – he contradicts himself, in the accusations he brings, making his purpose / motivations/intentions highly questionable, from the actual declared scope.*
