

Bucharest, Friday, February 11th, 2011

To Whom it May Concern,

My name is Catalin Buiu, I am a professor of Computer Science/Artificial Intelligence at Politehnica University of Bucharest. As background experience, I have been working in the field of artificial intelligence since 1990. You may find additional details about my activity on my personal website: <http://cbuiu.ics.pub.ro> , Summary Bio: <http://cbuiu.ics.pub.ro/bio.html>

I am in a privileged position to speak in reference to the Semantic Web idea and Web 3.0 solutions Razz Serbanescu has enabled through his invention and innovation methodologies. I think they have a solid foundation and provide exciting opportunities in the field of Semantic Web and Mobile Communications. I also consider the innovation methodology, innovation approach to resolving Semantic Web problems as a revolutionary next step in the evolution of business and technology.

I consider this a uniquely interesting and challenging opportunity, and I would like to reaffirm my support and confidence in the Semantic Web breakthrough enabled by Razz's innovation system/approach, and the feasibility of implementing the system/solutions at a large scale, having been personally involved in this project, such that I can attest to the functionality of the concepts in real life experiments and simulations, bringing together the cell phone and the laptop in one homogeneous system, with access to Semantic Web functionality and Web 3.0 results requiring no more than a Web/WAP enabled mobile device.

Kind regards,

Prof. Dr. Ing. Catalin BUIU
Department of Automatic Control & Systems Engineering
